

Emily Hughes

Ph.D. Candidate, Earth and Atmospheric Sciences First Year
ARCS Scholar Lim/ARCS Award

The Salts of Mars: Understanding the ancient climate of Mars through aqueous minerals

I would like to thank my advisors Dr. James Wray and Dr. Frances Rivera Hernández who have overseen my research in the Wray Lab and PLANETAS Lab respectively. Dr. Suniti Karunatillake at Louisiana State University also supported and mentored for much of this work. Funding was provided by the NSF GRFP.
